SOLU Light Novelties 2012

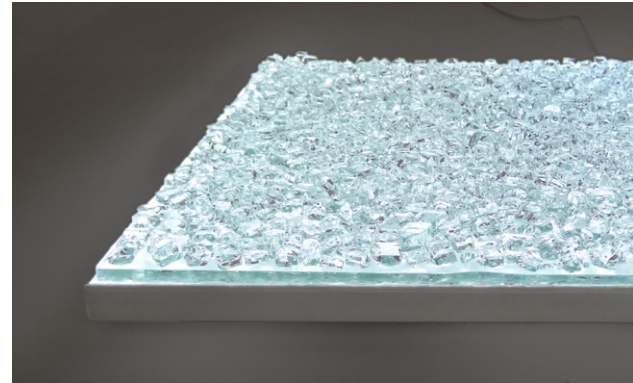

In 2012 we expand our Solulight collection by introducing three new lighting solutions. All these novelties utilize the best features of our glinting Arctic Crystal glass, developed and handmade of recycled glass by nGlass oy in Finland. Equipped with led lights and optic fibres these new lightning fixtures are both gorgeous and environmental friendly.

SOLU

ARCTIC SHINE

Crushed ice in the sunshine

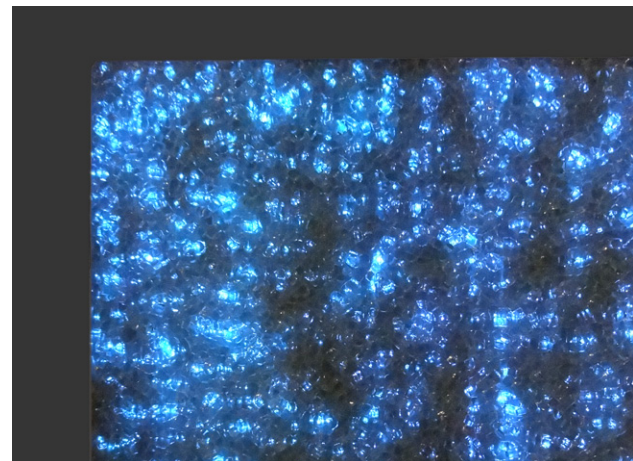

Led strips give even light for the whole glass surface and make the Arctic Crystal pieces glint randomly. This gives a light reflection imitating very well natural water full with ice pieces in the sunshine. Arctic shine is a ready-to-install wall light with included transformer. This flat wall light's dimensions are 25x25 cm with only 2 cm thickness. Arctic Shine is IP 67 rated and suitable for bathrooms and spa environments.

ARCTIC SKY

Northern lights on your wall

Arctic Sky is a modular system with a beautiful Northern lights –effect. Optic fibers are integrated in Arctic Crystal glass material and you can make your choice of colors to change with the frequency you want. Use Arctic Sky to create a beautiful hypnotising light element with a slow color movement or play with bright colors and short frequency. Size of one Arctic Sky module is 50x50 cm. Thanks to optic fibers, the modules are totally maintenance free and also suitable for hot environments like saunas.

ARCTIC STREAM

An illuminating northern brook on your bathroom wall

With Arctic Stream you can make part of your wall tiling glow and illuminate eg. your bathroom. We integrated a led strip to our top quality glass tile. Light reflection is controlled by Arctic Crystal pieces and the result is both elegant and luxurious. Arctic stream creates a light stream that looks like a northern brook with melting ice in the sunshine. Thickness of the Arctic Stream is only 10 mm which enables the installation among other tiling. Tile sizes are 15x40 cm and 10x30 cm. The concept is modular. Make the stream as long as you want or design your own set-up. Arctic Stream is IP 67 rated and suitable for bathrooms and spa environments.

All products are designed and handmade in Finland by nGlass.
